SUMMARY

Frontend Engineer with 8+ years of expertise in TypeScript, Angular, React, Next.js, and Vue, architecting enterprise products across edtech, fintech, and e-commerce. Led enterprise design system development (20+ components), optimized WCAG AA accessibility and Core Web Vitals, and built reliable frontend experiences with automated testing and CI-driven quality practices. Experienced in NestJS backend API development, automated AWS deployments (CloudFront/S3) to cut release times by 40%, and directed 5–6 person engineering teams with a 95%+ on-time delivery rate.

EXPERIENCE

Frontend Engineer

New Taipei City, Taiwan

ViewSonic

Jul 2024 – Aug 2026

- Built and maintained core company products, including VS Account, myViewBoard, and myViewBoard Hub, supporting thousands of enterprise and education users across Angular and React-based frontend architectures.
- Collaborated with UI/UX designers to establish an internal design system with 20+ reusable components, defining shared patterns, design standards, and accessibility guidelines to improve consistency and accelerate feature delivery by 20%+.
- Implemented accessibility improvements to achieve WCAG AA compliance and optimize Core Web Vitals, reducing CLS to below 0.1.
- Established automated frontend testing practices with Jest and CI pipelines, reducing regressions and increasing release confidence across core products.
- Implemented automated deployment workflows for 5+ frontend projects using AWS CloudFront and S3, reducing release time by 40% and improving web performance.
- Served as Scrum Master, coordinating Agile ceremonies and driving team execution to maintain on-time delivery across cross-functional workstreams.
- Developed scalable backend APIs with NestJS to support product growth and improve service reliability.
- Adopted Claude Code and OpenSpec to standardize implementation workflows and accelerate delivery across frontend teams.

Assistant Frontend Manager

Taipei, Taiwan

25sprout

Mar 2022 – Jul 2024

- Established code review standards and quality gates to improve engineering consistency and delivery reliability.
- Managed 10+ internal packages through GitLab Package Registry to reduce duplication and improve development efficiency.
- Led a 5–6 person frontend team, driving system architecture and task breakdown to maintain a 95%+ on-time delivery rate.
- Mentored junior engineers and established frontend guidelines, reducing onboarding time for new hires to under 3 weeks.
- Led SEO and performance initiatives that pushed key e-commerce pages to Google Page 1, driving organic traffic growth.

Senior Frontend Developer

Taipei, Taiwan

25sprout

Nov 2021 – Mar 2022

- Developed customized front-end systems and promotional event websites using Angular.
- Built e-commerce platforms and brand marketing websites using React and Redux.
- Partnered with PMs to clarify functional requirements and provided technical solutions and estimates.

Frontend Developer

XtremeApp Technology

Taipei, Taiwan
Nov 2017 – Oct 2021

- Maintained and enhanced existing enterprise web applications using JavaScript and jQuery.
- Developed internal systems and admin portals for finance and insurance clients using Angular and Angular Material.
- Built and scaled core internal products using Angular.
